HELLBRUNN
Lustschloss zu Salzburg

The attraction

There are historic Trick fountains, mystical grottos, the Mechanical Theatre or the Royal table – this Archbishop’s playground from the early 17th century continues to enchant visitors to this day. Archbishop Markus Sittikus, their designer, once relaxed here from the daily chores of government. Follow his example and enjoy the pleasure palace in a small group: take a private tour through the magical Trick fountains.

The benefits

The exclusive advantages for your group: This guided tour is entirely designed around your wishes and preferences. Whether the focus is on historical, social or technical details – you decide! You can also choose your date and time.

The guided tours take place outdoors when the weather is fine and include the Trick fountains. In bad weather we will gladly guide you through the palace with its new interactive exhibition and the grottos, such as the Birdcall Grotto, Neptune Grotto, Ruins Grotto and Mirror Grotto. We make our way through secret passageways not open to the general public.
